

UNO/UNO REFIT

Suitable for mounting on timber, masonry, stone, etc. Non adjustable for one way wall washing, can be mounted with the lamp directed up or down. Water resistant with a 77mm diameter mounting base, complete with stainless steel screws.

The UNO REFIT is a 240 ac mains option suited to an installation where mounting a transformer is a problem, e.g. a brick wall where there is only the cable protruding out of the wall and it is not an option to recess the transformer or when replacing an existing light fitting. The base size increases in size to accommodate the encapsulated IP66 dimmable transformer.

Both fittings are supplied with a lamp and a 50watt transformer.
